#### **Location:**

Dubai Hospital at Radiology Department Ultrasound Reception

#### **Purpose:**

It is a procedure that will give detailed images of the internal organs of the abdomen including the liver, gallbladder, spleen, pancreas, and kidneys. Beside this it is radiation free and painless.

#### **Preparation:**

You should wear comfortable, loose-fitting clothing for your ultrasound exam.

You will need to remove all clothing and jewelry in the area to be examined.

You may be asked to wear a gown during the procedure.

For a study of the liver, gallbladder, spleen, and pancreas, you may be asked to eat a fat-free meal on the evening before the test and then to avoid eating for eight to 12 hours before the test.

For ultrasound of the kidneys, you may be asked to drink four to six glasses of liquid about an hour before the test to fill your bladder.

You may be asked to avoid eating for eight to 12 hours before the test to avoid gas buildup in the intestines.

If you take insulin, you must consult with your physician.

#### **Procedure:**

- The procedure usually takes approximately 45 minutes. Test times may vary due to specific physician requests.
- You will be asked to change into a gown and provide a brief history.
- You will then place on a stretcher.

DUBAI HOSPITAL  
RADIOLOGY DEPARTMENT

- In order to obtain quality images, we will need to place a water-based gel on your abdomen.
- A plastic device called a transducer will be placed over the abdominal area and moved back and forth to obtain the images necessary to answer your physician's questions.

**After Care:**

After the test, you may resume all normal activities. Your attending physician will discuss the results of your ultrasound examination with you.

If you have any questions, please do not hesitate to contact one of our technologists at (215) 663-3123.
