

### Pelvic Ultrasound Form

Patient Name: \_\_\_\_\_ Age: \_\_\_\_\_  
Health Card No: \_\_\_\_\_ Fees: \_\_\_\_\_  
Nationality: \_\_\_\_\_ Date: \_\_\_\_\_  
Telephone No: \_\_\_\_\_ Time: \_\_\_\_\_

#### Location:

Dubai Hospital at Radiology Department Ultrasound Reception

#### Purpose:

This test provides a picture of the pelvis including the uterus and ovaries. Beside this it is radiation free and painless.

#### Preparation:

You should wear comfortable, loose-fitting clothing for your ultrasound exam.

You will need to remove all clothing and jewelry in the area to be examined.

You may be asked to wear a gown during the procedure.

Patients should drink 32 ounces of fluid approximately 1 hour prior to the exam.

**Please do not empty your bladder during this time!!** Because a full bladder helps to visualize the uterus, ovaries, bladder wall and prostate gland.

Medications can be taken prior to the examination.

#### Procedure:

- The procedure usually takes approximately 45 minutes. Test times may vary due to specific physician requests.
- You will be asked to change into a gown
- Then the radiologist will ask for a brief history including the date of your last menstrual period, use of hormone replacement or birth control, previous pregnancies and any surgeries of the pelvis.
- You will then place on a stretcher.
- A water-based gel will be spread over your pelvic area. This gel helps to provide us with quality images

- A plastic device called a transducer will be placed over your pelvic area and moved back and forth to obtain the images necessary to answer your physician's questions.

Sometimes an adequate study cannot be obtained just by scanning over your pelvic area. If this is the case, another type of pelvic ultrasound may be offered to you. It is called a transvaginal ultrasound examination and entails the following:

- You must empty your bladder
- You will then be placed on a stretcher with stirrups similar to those in your gynecologist's office.
- We have a transducer specifically designed for this study.
- These transducers are sterilized between patients and covered with a non-latex sheath during the ultrasound examination.

Most patients find the transvaginal ultrasound similar to a pelvic examination done in your gynecologist's office.

**After Care:**

After the test, you may resume all normal activities. Your attending physician will discuss the results of your ultrasound examination with you.

If you have any questions, please do not hesitate to contact one of our technologists at (215) 662-3123.

**Contact Number for appointment: -**

**Sunday – Thursday from 12pm – 2pm: - 04-2195608 or**

**During weekend (Friday-Saturday) and afternoon: - 04-2195600 / 04-2195601**

**Fax No: - 04-2195613**
